Lab sheet 03

Question 01

Create a simple web page named "music.html" centered around different music genres.

(a) Table Structure

1. Create a table with 5 columns as follows:
 - Genre
 - Sub Genre
 - Album Cover
 - Video Preview
 - Audio Sample
2. Merge the heading using colspan and display: Top Music Hits – 2026
3. Use rowspan in the Genre column as follows:
 - Pop (2 sub genres)
 - Dance Pop
 - Indie Pop
 - Rock (3 sub genres)
 - Classic Rock
 - Alternative Rock
 - Hard Rock

(b) Media Requirements

- Add a video preview using <iframe> (YouTube embed)
- Add an audio sample using <audio controls>

(c) Styling Requirements

- Center the table on the page
- Use borders with border="1" and border-collapse
- Apply a light blue background for table headings
- Center-align all content inside the table
- Add padding inside table cells

Question 02

Create a web page named **products.html** titled “Online Store Product Catalog”.

Requirements

1. Add a main heading: Online Store Product Catalog.
2. Create a centered table with borders and collapsed borders.
3. Table columns must include:
 - Category
 - Product
 - Product Image
 - Price
 - Availability
 - Actions
4. The first row must be a merged heading using `colspan="6"` displaying:
January Deals – 2026
5. Use `rowspan` in the Category column:
 - Electronics (3 products)
 - Home Appliances (2 products)
6. Add product images using `<img>` (width: 80px).
7. In the Actions column, include:
 - A Buy Now button
 - A Details link
8. Styling Requirements
 - Light gray background for table header
 - Center images and action buttons
 - Add padding inside table cells

Question 1 Output

Music Genre Catalog
